DO YOU HAVE THE RIGHT SLICER FOR YOUR OPERATION?

To help you determine which slicer is best suited for your operation, Globe created this slicer selection guide. A few main things to consider...

1. How many hours per day will the slicer be used?

If slicing plays a significant role in your daily operation, Globe's premium slicers can withstand constant use and are recommended for their precision slicing, powerful performance and proven reliability.

2. Will you be slicing cheese? If so, how much and how often?

If slicing cheese is integral to an operation, Globe slicers are a must-have! Globe's Premium slicers are well suited for slicing cheese as the slicer does not get bogged down when the cheese makes contact with the knife. For medium-duty operations where cheese will be sliced on a limited basis, the heavy-duty or medium-duty compact slicers will work, see the selection guide below.

3. What if the product is frozen?

Products such as frozen meat are difficult - at best - when slicing. Globe's S-Series Frozen Meat Slicers (S13-F and S13A-F) are designed with a serrated knife to power through frozen meats.

Model No.	Time Slicing Meat	% Time Slicing Cheese	Manual (Slice to Order)	Auto (Bulk Slicing)	Motor	Blade (Diameter)	Max. Slice Thickness	Cutting Capacity		
								D (Diameter)	W (Width)	H (Height)
