# ATTENTION OWNERS AND OPERATORS

This equipment is designed to provide safe and productive processing of food products as long as the equipment is used in accordance with the instructions in this manual and is properly maintained. Importantly, unless the operator is adequately trained and supervised there is a possibility of serious injury. Owners of this equipment bear the responsibility to make certain that this equipment is used properly and safely to strictly follow all the instructions contained in this manual and the requirements of local, state or federal law.

Owners should not permit anyone to touch this equipment unless they are over 18 years old, are adequately trained and supervised, and have read and understand this manual. Owners should also ensure that no customers, children, visitors or other unauthorized personnel come in contact with this equipment. Please remember that we cannot anticipate every circumstance or environment in which our equipment will be operated. It is the responsibility of the owner and the operator to remain alert to any hazards posed by the function of this equipment and all moving parts. If you are ever uncertain about a particular task or the proper method of operating this equipment, ask your supervisor.

To prevent illness caused by the spread of food-borne pathogens, it is important to properly clean and sanitize the entire power drive unit as any surface of the power drive unit can become contaminated. It is the responsibility of the power drive unit owner/operator to follow all guidelines, instructions and laws as established by your local and state health departments and the manufacturers of chemical sanitizers.

When cleaning your power drive unit, pay particular attention to cracks, broken seams and any area that may collect food debris. If your power drive unit or any of its parts, is damaged or broken, it may become more difficult to properly clean and sanitize the unit. If your power drive unit is damaged or needs repair, contact an experienced service individual immediately to ensure the power drive unit can be properly sanitized. If you have any questions, please contact Globe at 937-299-5493.

Throughout the manual you will see warnings to help alert you to potential hazards and to help promote safe use of this equipment.

**Warnings affecting your personal safety are indicated by:**

**Warnings related to possible damage to the equipment are indicated by:**

Make certain that the instruction manual is available for easy reference by any operator. An English language warning label has been placed on the power drive unit. French warning labels are available upon request. If the warning label or this manual are misplaced, damaged, or illegible, or if you require additional copies, please contact your nearest representative or the factory directly for these items at no charge.

Please remember that neither this manual nor the warning labels replace the need to be alert, to properly train and supervise operators, and to use common sense when using this equipment.

# CLEANING & SANITIZING

## WARNING

### TO AVOID SERIOUS PERSONAL INJURY:

- BEFORE CLEANING, SERVICING, OR REMOVING ANY PARTS, always turn power drive unit OFF and unplug unit.
- NEVER attempt to clean power drive unit while power drive unit is in operation.

## CAUTION

- DO NOT put power drive unit housing in the dishwasher or immerse in water.
- Dilute detergent per supplier's instruction. Products containing sodium hypochlorite should not be used on power drive unit.
- DO NOT hose down, pressure wash, or pour water on power drive unit.
- NEVER use a scrubber pad, steel wool, or abrasive material to clean power drive unit.

## WARNING

To prevent illness or death caused by the spread of food-borne pathogens, it is important to properly clean and sanitize the entire power drive unit as any surface of the power drive unit can become contaminated. It is the responsibility of the power drive unit owner/operator to follow all guidelines, instructions and laws as established by your local and state health departments and the manufacturers of chemical sanitizers.

Once your power drive unit makes contact with food product, the entire power drive unit, including removable parts, must be thoroughly cleaned and sanitized. This process is to be repeated at least every 4 hours. Use these procedures and information; and must comply with additional laws from your state and local health departments.

As with all food contact surfaces, it is extremely important to properly sanitize the entire power drive unit and to closely follow the instructions on your quaternary sanitizer container to make sure proper sanitation is achieved to kill potentially harmful bacteria.

**IMPORTANT:** If a chemical sanitizer other than chlorine, iodine or quaternary ammonium is used, it must be applied in accordance with the EPA-registered label use instructions. Excessive amounts of sanitizer and use of products not formulated for stainless steel or aluminum can VOID your warranty.

Sanitizer concentration must comply with section 4-501.114, Manual and Mechanical Warewashing Equipment, Chemical Sanitization - Temperature, pH, Concentration, and Hardness of the FDA Food Code.

For more information on proper kitchen and equipment sanitation, visit [www.servsafe.com](http://www.servsafe.com) provided by the National Restaurant Association (NRA).

## CAUTION

- ALWAYS turn power drive unit OFF, remove safety key from ON-OFF switch and unplug the power cord BEFORE cleaning.
- It is extremely important to follow the instructions on the sanitizer container to make sure proper sanitation is achieved. Allow the parts to air dry before placing them back on power drive unit!

# CLEANING & SANITIZING

## POWER DRIVE UNIT DISASSEMBLY, CLEANING & SANITIZING
