In order to meet the demands of a busy kitchen, speed in food prep is vital. Globe's Power Drive units quickly slice, grate, chop and tenderize with a powerful 1 HP motor and standard #12 hub attachment. This simple convenience allows the operator to customize their drive unit however they choose.

Globe Power Drive units are available as the 200 RPM GPD-L for processing meat, cheese and vegetables or the 700 RPM GPD-H* for faster processing of cheese and vegetables. Both models accept all #12 hub attachments and are backed by a 1-year parts & labor warranty.

*GPD-H not for grinding meat or shredding cheese.
