Globe’s all-new S-Series slicers deliver more of the powerful features operators need and the high-quality cuts customers expect. With consistent performance, convenience, and low cost of ownership, the S-Series sets a new standard for heavy-duty slicers.
What makes the S-Series MORE than the sum of its parts?

Designed with the user in mind, every inch of the S-Series slicers is packed with features to make operation, cleaning and maintenance easier. Better engineering increases yield and offers more operator protection features. Innovation and quality construction lower the total life-cycle cost.

- **NO-SLIP MEAT GRIP** holds product secure, reducing side-to-side motion and providing better slice quality.
- **EXTENDED THUMB GUARD** keeps operator’s hands further away from knife during operation.
- **BIND-FREE SHOULDER WEIGHT** easily glides up and down the slide rod, adding to product stability – increasing yield and slice quality.
- **13” STEEL KNIFE** retains edge for paper-thin slicing.
- **TOP-MOUNTED SHARPENER** with long-lasting synthetic diamond (cBN) surfaces, offers optimal sharpening performance in one easy motion.
- **EXTENDED CARRIAGE** easily accommodates large product like prosciutto and bacon.
- **CARRIAGE TILT INTERLOCK** prevents knife from running when carriage is not secured (SG13/SG13A).
- **CLEAR TEXT DISPLAY** for confusion-free training, operation, diagnostics and maintenance.
- **POWERFUL 1/2 HP MOTOR** easily handles all-day meat and cheese slicing.
- **EXTRA SPACE UNDER KNIFE** makes it easy to clean in typically hard-to-reach places.
- **FLUTED CARRIAGE** helps keep product in place and guides it into the knife.
- **PATENTED BASE DESIGN** one-piece anodized aluminum base makes cleanup fast and easy.
- **ERGONOMIC HANDLES** add to operator comfort while color cues the operator for optimal operation.
- **LIFT LEVER** (automatic) or **KICKSTAND** (manual) provides easy cleaning under the slicer.
- **MANUAL & AUTOMATIC MODES** for to-order or bulk slicing.
- **PRECISION CONTROL INDEXING** patent-pending system provides more control on the first 1/8” of slicing, increasing consistency and precision and reducing food costs.
- **EXTRA SPACE UNDER KNIFE** makes it easy to clean in typically hard-to-reach places.

What makes the S-Series MORE than the sum of its parts?
Slice **Quality**

Globe's S-Series slicers have gone above and beyond to deliver quality slices. The innovative indexing system, end weight, meat grip, and carriage geometry combine for more precision, more consistency and more yield.

**MORE PRECISION**

Quality slices begin with precise control. Globe's patent-pending indexing system provides more control on the first 1/8", where most slicing occurs. No other slicer in the world utilizes the S-Series cam style. Here’s how it works.

Traditional slicers begin the travel of the seated pin at the center of the cam, moving outward. The S-Series not only bevels the pin and cam path, preventing play caused by gradual wear, but also the travel begins on the outside of the spiral. This simple innovation delivers precise control where it matters most.

**MORE CONSISTENCY**

The only thing better than paper-thin slices is consistent paper-thin slices. Keeping the product from moving while slicing is vital to slice consistency. The S-Series slicers combine the unique design of the meat grip teeth, weighted arm and the grooved carriage to keep even the largest products in place.

Putting the weight at the shoulder instead of on the meat grip prevents binding as the weight moves down the slide rod, making it easier to guide the product into the knife. The multi-directional lines on the meat grip and grooves in the carriage add to the product stability, reducing side-to-side motion.

**MORE YIELD**

With all the advancements to the meat grip, end weight and carriage, product yield naturally increases. With more consistency, wedges are less likely to develop, letting the operator slice down to the very end of the product. The steel knife and sharpening system maintains the thinnest edge, adding to a superior slice and improved yield.

Ease of **Use**

Every aspect of operation is made easier through S-Series features like the Clear Text display, ergonomic handles, extended carriage, color cues, varying speeds and stroke lengths (with automatic models), and a top-mounted sharpener. These premium slicers are truly designed with the user in mind.

**MORE INFORMATION**

Slicer training, operation and maintenance is now confusion-free with the industry’s only Clear Text Display. Speed and stroke length control are prominently displayed, error messages in English, Spanish or French, as well as service diagnostics to minimize down time.

Keep up on regular maintenance with system information; including powered-up time, slice counts and total hours of operation.

**MORE CAPACITY**

Slice larger and more product with an extended carriage and wider receiving area. Tilting and removable carriages accommodate up to 13.75” high, 8” diameter, 1 1/2” wide product, like prosciutto, mortadella and bacon. The extra large receiving area holds more sliced product at a time, and also channels liquid away for easier clean-up.

Check out the Slaw Tray to see how it helps contain large amounts of sliced product, like lettuce and cabbage.

**MORE INTUITIVE**

Color cues the operator to areas designed for proper and safe use. Touch points like handles and knobs are black to designate ideal operator contact areas, keeping hands further away from the knife.

**MORE CONVENIENT SHARPENING**

The top-mounted sharpener is stored on the slicer for convenience and is easily removed for cleaning. It utilizes long-lasting synthetic diamond surfaces (cBN) to sharpen and de-burr in one simple motion.
Ease of **Cleaning**

While features like the meat grip and indexing system help save money, these features help save time, and isn’t that the same thing? Check out the S-Series cleanability features and see how Globe speeds up cleaning time.

**MORE ACCESS**

No other slicers have more room to clean in those hard-to-reach spaces than the S-Series. The patented one-piece anodized aluminum base minimizes seams and provides the most access under the knife and around the carriage for quick and easy cleanup.

The S-Series also offers more access under the slicer, with kick stands on manual models and a lift lever on the automatics. These features make cleaning under the slicer a cinch.

**MORE CONVENIENCE**

Everyone’s dream slicer is one they don’t have to clean. While that would be nice, Globe has a more realistic solution. For cleaning convenience, the sharpener, knife cover, knife, carriage, meat grip and slide rod are all easily removable.

**NOW, EVEN MORE!**

The all-new knife removal tool easily lifts the knife off the slicer and locks it in a tool during cleaning. S-Series slicers also offer a removable carriage when space is limited for tilting. Removable parts speed up cleaning, boosting kitchen productivity.

**Total Cost of ** OWNERSHIP

The savings don’t end at time of purchase. Check out the after-sale benefits that keep total life-cycle costs down and the S-Series up and running.

**MORE PEACE OF MIND**

Globe S-Series slicers come with a 2-year parts & labor warranty, double that of our key competitors, with unparalleled customer support extending beyond the sale. Technical support is available 8 a.m. - 8 p.m., 7 days a week (excluding holidays) toll free at (866)-260-0522.

**MORE SAVINGS**

Knife and parts replacement costs reduce the total life cycle cost of the slicer and are lower than competitor replacement costs.

**MORE AVAILABILITY**

S-Series service and parts are available from more sources including multiple local servicers, parts distributors and dealers.

At Globe Food Equipment, we believe both products and people are important. While our name has been synonymous with reliable, high-performance slicers for decades, it's also been a mark of lasting value and personal service. We provide exceptional foodservice equipment and unparalleled after-sales support.

Backed by our strong network of dealers and service experts, Globe is a name you can count on — a name you can trust.
