Globe Food Equipment Co.

PRODUCT CATALOG

Superior quality, performance and value in every product.
In 1921 the Globe Slicing Machine Company was built on a foundation of ingenuity, innovation and a drive to succeed. That passion led the company to invent and patent the gravity-feed slicer, revolutionizing the slicing industry by increasing slice quality and productivity for operators.

Seventy years later in Dayton, Ohio, the birthplace of innovation, Globe Food Equipment was founded from that same spirit. With a focus on quality, performance, value and service; Globe offers best-in-class slicers, mixers and scales and a competitive array of distinctive food service equipment. Our solutions and award-winning customer support for end-users, from pizza operators to delicatessens and chefs around the world, allow us to maintain our position of leadership in the foodservice equipment industry.

Globe is more than a brand name; it’s a promise of consistently delivered excellence. Globe Food Equipment is dedicated to your success.

Do you have the right slicer for your operation?
Use Globe’s selection guide below to determine which slicer is best suited for your operation. A few main things to consider...

1. How many hours per day will the slicer be used?
   If slicing plays a significant role in your daily operation, Globe’s premium slicers can withstand constant use and are recommended for their precision slicing, powerful performance and proven reliability.

2. Will you be slicing cheese? If so, how much and how often?
   If slicing cheese is integral to an operation, Globe’s Premium slicers are well suited for slicing cheese as the slicer does not get bogged down when the cheese makes contact with the knife. For medium-duty operations where cheese will be sliced on a limited basis, the heavy-duty or medium-duty compact slicers will work; see the selection guide below.

3. What if the product is frozen?
   Products such as frozen meat are difficult - at best - when slicing. Globe’s S-Series Frozen Meat Slicer Factory-installed option has a serrated knife to power through frozen meats.

Globe® SP30P, SP62P Pizza Mixers

While all Globe mixers can mix pizza dough, the SP30P (pictured pg. 15) and the SP62P (left) are specifically built for tough dough applications.

The 60 quart SP62P is perfect for high-volume pizza operations. With the capacity to handle up to 50 lbs. of flour and three gallons of water, this powerful, reliable product will minimize mix time and maximize dough output.

- High torque, direct-gear drive transmission can handle the most demanding mixing applications: 1.5 HP SP30P, 3 HP SP62P
- Digital controls, timer, and bowl lift (power bowl lift on SP62P)
- Heat-treated steel alloy gears and shafts
- Comes with a stainless steel bowl and spiral dough hook
- Bowl truck included with SP62P

Spiral MIXERS

Quality, power and endurance, everything you’ve come to expect in Globe planetary mixers can now be found in Globe Spiral Mixers.

Two models, based on dough output weight — 130 & 175 pounds — will certainly mix it up and produce the best quality dough. Put an end to ingredient waste and dough that is too dry or too moist. Maximize output and effort. Go Spiral — make more dough!

Key Features Spiral Mixers
Models: GSM130 & GSM175

- Powerful dual high torque motors — bowl and dough hook
- Manual and automatic control functions
- Two fixed speeds
- Dual 20 minute electronic digital timers for automatic shift from 1st to 2nd speed
- All metal construction with a cast aluminum top cover
- Polished diamond finish stainless steel bowl
- Reversible bowl drive for mixing smaller batches (1st speed only)
- Bowl jog control for easy dough removal and bowl cleaning
- Stainless steel ball bearing bowl drive for extra durability
- Sturdy reinforced dough hook easily handles large, heavy batches
- Front and rear casters for mobility
- Includes: stainless steel bowl, spiral dough hook, wire bowl guard, leveling feet and 10.5’ power cord

SPIRAL VS PLANETARY...
Spiral mixers have a spiral arm that rotates on a fixed vertical axis, while the bowl spins in a counter-clockwise direction.

Planetary mixers use an agitator with an attachment that moves in circular orbits along the inside wall of a stationary bowl.

*NOTE: The mixer capacity depends on the moisture content of the dough. When mixing dough (pizza, bread, or bagels) check your Absorption Ratio percentage (AR%)! Absorption Ratio % (AR%) = Water Weight divided by Flour Weight. The capacities listed here are based on flour at room temperature and 70°F water temperature. (1 gallon of water weighs 8.33 lbs.)

**Key Symbols**

- Maximum Mixing Time - 7 Minutes
- If high gluten flour is used, reduce batch size by 10%.
- If using chilled flour, water below 70°F, or ice, reduce batch by 10%.
- 2nd speed should never be used on 50% AR or lower with the exception of the SP60. The SP60 requires a 50% reduction in batch size to mix in speed 2 with 50% AR doughs.
